Project: Blacktop
TPS Report
12/02/2019

Team: Skyler Sheler   skyler.j.sheler@wmich.edu   (616) 438-3527
             Erron Johnson   erron.d.johnson@wmich.edu   (269) 547-8933
             Allin Kahrl   f.allin.kahrl@wmich.edu   (207) 522-4859
             Tyler Henniges   tyler.m.henniges@wmich.edu   (269) 330-4229
Client: WMU Computer Club   colin.c.maccreery@wmich.edu   (269) 276-3106
Contact: Colin MacCreery   colin.c.maccreery@wmich.edu   (269) 276-3106
Project Lead Allin Kahrl   f.allin.kahrl@wmich.edu   (207) 522-4859

Task	Who will complete	Time	Risk 1-10	% complete	Actual time	review
T1	SS	1 hour	1	100%	1 hour	AK TH EJ
T2	SS AK TH EJ	5 hours	3	50%	TBD	TBD
T3	SS AK TH EJ	10 hours	3	70%	TBD	TBD
T4	SS AK TH EJ	10 hours	6	40%	TBD	TBD
T5	SS AK TH EJ	10 hours	5	50%	TBD	TBD

T1: Write the requested deliverables for the week
        Write the TPS Report and Stories for the week
T2: Test the board to see if it can handle all of the peripherals being turned on at once
        The maximum current load of the board must be determined, and if turning on all
        peripherals exceeds that load a failsafe must be developed to prevent the board from
        breaking.
T3: Finish breadboarding a prototype board.
        The components will have to be socketed into a breadboard and tested for full
        functionality. This is currently the largest portion of the project to overcome and time
        specifications will have to be further analyzed.

T4: Develop drivers using SPI to interface with the on-board EEPROM

        Drivers must be developed using a serial peripheral interface to transfer data from the main board to the on-board EEPROM

T5: Develop the CAD files for the production circuit board

        The circuit board must be designed via KiCAD before a prototype board can be ordered
